## Technical Skills

**Backend:** Spring Boot, Spring, JPA (Hibernate), Java, Spring Security  
**Frontend:** React, Redux Toolkit, TypeScript, Tailwind CSS, React Router, HTML5, SCSS  
**Database:** MySQL, PostgreSQL, SQL  
**Tools:** Git, GitHub, Postman

## Experience

### TechneAi Pvt. Ltd.

Jan 2024 – Jun 2024

Software Developer Intern

Pune, India

- Worked on developing and improving user interface screens as part of a team.
- Implemented UI changes based on application data and user roles.
- Managed shared and screen-level data to keep the UI behavior consistent.
- Handled user input and form submission flows with proper validations.
- Connected frontend screens with backend APIs to display updated data in real time.
- Developed and managed controlled forms in React to handle user inputs and state synchronization.
- Followed a component-based structure and coding guidelines to keep the code clean and easy to maintain.

## Projects

### ShopEase | Tech Stack- Spring Boot, JPA (Hibernate), JWT Authentication, React, Redux Toolkit, Tailwind CSS, MySQL, REST APIs

- ShopEase is a scalable, full-stack e-commerce platform engineered with a modern Java backend and React frontend
- Built a backend to handle business logic, database operations, and API communication between client and server.
- It implements secure authentication and role-based authorization using Jwt Authentication
- Transactional data handling for products, carts, and orders with admin dashboard implementation.
- Developed with React and Redux Toolkit for predictable global state management, enabling seamless cart, order, and user session handling.
- The UI is crafted using Tailwind CSS with a component-driven approach for a clean, responsive, and production-ready user experience
- Integrated frontend and backend seamlessly using REST APIs with proper state handling and data flow.

### MedRec | Java, Servlet, Jsp, HTML5, CSS3, Javascript, Bootstrap, Ajax, MySql

- Built MedRec, a full-stack healthcare platform enabling patients to securely store, edit, and manage personal medical records through an intuitive interface.
- Implemented symptom-based disease diagnosis using external APIs to provide real-time preliminary health insights.
- Enabled real-time doctor-patient consultations, allowing direct communication with verified healthcare professionals.
- Admins manage doctor verification, user oversight and generate comprehensive health reports for system management.

## Education

### MES Institute of Management and Career Courses

June 2024

Master of Computer Applications (CGPA: 8.05)

Pune, Maharashtra

### Yashwantrao Chavan Institute of Science

June 2022

Bachelor of Computer Science (CGPA: 9.81)

Satara, Maharashtra

### Yashwantrao Chavan Institute of Science

June 2019

Class XII in HSC (Per: 62.15)

Satara, Maharashtra

### Anant English School

June 2017

Class X in SSC (Per: 83.00)

Satara, Maharashtra

## Certifications

- Java Full Stack Development – QSpiders Deccan, Pune
